Bulletin #2011-004 1 – June - 2011

Subject:
Elimination of the term “road points”

Overview:
Effective immediately, add the following sections to Article 7.15.A:

A. "Informational" scores may be posted at any time during or after an event. Complete "provisional" control-by-control scores shall be posted for all finishers at a time and place specified in the Supplementary Regulations. However, the Provisional results for national events must be generated and printed by computer from files that will be used to compile the Official results for Rally America and must be sorted by overall sequence and show all stage times and other time penalties ~~road points~~, otherwise they cannot be made Official without special approval from RallyCar.

Rationale: The term “road points” has been used historically and continue to be used in the results, however it has not been defined in the PRR. Instead of making a large number of changes in order to formally incorporate the term into the PRR, it was decided to eliminate its one use there. Competitors are free to use the term informally, but it should not be used in official event publications.

Questions regarding this bulletin received by RallyCar from licensed Drivers and Co-Drivers will be answered in writing.
